PROJECTS

- Injury Response Automation System**
- Developed a web-based emergency response platform using HTML, Tailwind CSS, JavaScript, and React.
 - Implemented user authentication using Firebase Authentication.
 - Integrated Firestore for secure storage of personal, medical, and emergency contact data.
 - Generated QR codes linked to users' emergency profiles.
- Online Examination**
- Built a full-stack Online Exam System using Java, MySQL, and JSP/Spring Boot with secure login, timed exams, and automated result evaluation.
 - Implemented backend APIs, database design, and a responsive UI for smooth exam management.
 - A crucial feature that counts down and auto-submits the exam when time is up.
- Chatting Application**
- Built a real-time Chatting Application using Java and NetBeans with a Swing-based GUI.
 - Implemented socket programming to enable smooth two-way client-server communication.
 - Designed for user-friendly interaction and seamless message exchange over a network.
